## What is the CC?

The Computer Club (CC) was founded in 2002 (Under the auspices of the Center for the Development of Civil Society).

It was formed to provide the youth with the computer knowledge and access to international the modern technologies

## The CC Goals

### *The CC is established*

- to gather young people together
- to provide the young people with the opportunity and to do their favorite work exchange experiences in this field
- to provide the young people with the opportunity for self-expression and self-determination

## The CC Objectives

- to teach members of the club the fast typing
- to teach the structure of the computer, how to repair it, how to install new programs and others
- to provide the members with the opportunity to use the computer overtime to deepen their knowledge (with the initial registration)
- to teach the basic knowledge to use internet

## The Principals and Methods of the Work

- Corresponding groups are determined by method of inquiry
- Knowledge is accumulated by means of the corresponding literature
- The ability of swift typing is developed by the aid of the professionals
- The ability to communicate is developed through the Internet

## How to become a member?

The following documents are required to become a member of CC:

- Membership application
- CV
