

LETTER OF RECOMMENDATION

I have known the activity of the *Association of Ghevond Alishan Scientific Women Council* since its foundation and regard its activities very important for the construction of democratic society in Armenia. It is one of the first NGO-s in Armenia that held educational and research programs. I greatly appreciate all the educational programs implemented by this organization, especially I would like to mention the program “Drafting the Roster of Women Professionals in Armenia”. The results of the mentioned program present actual importance and interest for the National Academy of Sciences.

I consider the idea of organization of a conference very actual with intention to invite representatives from different fields of science and different countries. Such a conference will promote information exchange, sharing opinions and ideas. There were almost no conferences for over a long time on the matter of non-financiating.c

I hope the conference will create conditions for other scientific conferences and thus will give the impulse to scientific cooperation.

The idea of conference /”Women in Science in the Transition” I consider very urgent for the activization of scientific development of Armenia.

The recommendation is given to presenting to the Open Society Institute.

G. Sarkissyan
Academician
Vice-president of National Academy of
Sciences of Republic of Armenia.
